**SPT Maju** is the appointed agent of **ULTECH ENGINEERING SDN. BHD.** and the authorised system integrator (SI) of **Mitsubishi Electric.**

## ABOUT COMPANY

SPT Maju Sdn. Bhd., based in Miri, Sarawak, operates under the esteemed umbrella of Ultech Engineering Sdn. Bhd. Our focus is on delivering top-tier engineering solutions for Malaysia-wide projects within the energy sector, encompassing upstream, midstream, and downstream activities. We are committed to excellence in every facet of our operations, leveraging our specialized expertise to drive innovation and efficiency in the oil and gas industry.

### COMPANY OFFERINGS

1. Skilled and experienced onshore and offshore electrical tradespeople and engineers.
2. Full design packages including engineering and drafting for onshore, offshore and marine main switchboards and starters
3. Engineering solution with feasibility study, detailed engineering, field engineering and site support.

# VISION & MISSION

## Vision

To become a leading entity in the oil & gas services industry, particularly excelling in Power Distribution, Power Management, Control System & Automation.

### INDUSTRY COVERAGE OVERVIEW

*Power Distribution, Power Management, Control System & Automation Solution provider in East Malaysia, we have delivered numerous solutions for our local clients in various industries such as Oil & Gas, Marine, Ferroalloy, Palm Oil and Water.*

## Mission

- To be one of the premier service providers in electrical services in the Oil and Gas sector.
- We are committed to becoming the best-in-class solution provider for the industries that we are involved with.
- We are dedicated to developing and implementing innovative technology through strategic partnership.
- We are committed to being ethical and morally responsible in our work and everything that we do.

# OUR SERVICES

## Project Management

SPT Maju excels in providing comprehensive project management services tailored to the unique demands of the oil and gas industry. Our expertise ensures seamless coordination and execution of projects from inception to completion. We emphasize meticulous planning, efficient resource allocation, and adherence to timelines and budgets, guaranteeing successful project delivery every time.

## Engineering Design

Our engineering design services encompass detailed planning and innovative solutions to meet the complex needs of the oil and gas sector. We employ state-of-the-art tools and methodologies to create robust designs that optimize performance, safety, and cost-efficiency. Our team of skilled engineers is adept at transforming client requirements into practical, high-quality engineering solutions.

## Brands

We are Authorized Distributors/  
Partners of:

**Ultech Engineering**  
Quality Industrial Automation Solutions Provider

**MITSUBISHI  
ELECTRIC**

# OUR SERVICES (CONTINUED)

## PLC Programming

SPT Maju specializes in Programmable Logic Controller (PLC) programming, delivering custom automation solutions that enhance operational efficiency and reliability. Our programming services include developing, testing, and implementing PLC systems that are tailored to the specific processes of each client, ensuring precise control and monitoring of operations.

## HMI & SCADA Visualization

Our expertise in Human-Machine Interface (HMI) and Supervisory Control and Data Acquisition (SCADA) systems provides clients with advanced visualization and control capabilities. We design and implement user-friendly interfaces that facilitate real-time monitoring and control of industrial processes, enhancing operational transparency and decision-making.

# OUR SERVICES

## (CONTINUED)

### Control Panel Fabrication

We offer bespoke control panel fabrication services, crafting high-quality panels that meet stringent industry standards. Our panels are designed for durability and optimal performance in harsh environments. Each control panel is meticulously assembled and tested to ensure it meets the specific needs of our clients' systems and processes.

### Switch Board Fabrication

SPT Maju provides customized switchboard fabrication services, delivering reliable and efficient power distribution solutions. Our switchboards are engineered to support the electrical infrastructure of oil and gas facilities, ensuring safe and efficient operation. We adhere to the highest standards of quality and safety in all our fabrication processes.

*We offer bespoke control panel fabrication services, crafting high-quality panels that meet stringent industry standards.*

## OUR SERVICES (CONTINUED)

### Site Hook-up & Commissioning

Our site hook-up and commissioning services ensure that all systems and equipment are installed and operational as per the project specifications. We conduct thorough testing and validation to guarantee the seamless integration and functionality of new systems, minimizing downtime and ensuring a smooth transition to operational status.

### Control System On-Site Troubleshooting

SPT Maju offers prompt and effective on-site troubleshooting for control systems. Our team of experts is equipped to diagnose and resolve issues quickly, minimizing operational disruptions. We provide comprehensive support to maintain the reliability and efficiency of control systems, ensuring continuous and safe operations.

### Employee Training & Support

We believe in empowering our clients through comprehensive training and support services. Our training programs are designed to equip client personnel with the necessary skills and knowledge to operate and maintain systems effectively. We offer ongoing support to ensure that clients can fully leverage the capabilities of their installed systems.

*Our training programs are designed to equip client personnel with the necessary skills and knowledge to operate and maintain systems effectively.*
